PROJECTS

Non-invasive glucometer

Developed a prototype for a non-invasive glucose meter. The project aimed to provide a painless and convenient method for monitoring blood glucose levels for individuals with diabetes. Successfully demonstrated the feasibility of non-invasive glucose measurement with an accuracy of 93%.

Encounter based routing in opportunistic networks

Designed and implemented an encounter-based routing system for opportunistic networks using MATLAB. This project aimed to enhance data communication in challenging and disconnected environments by leveraging proximity-based routing strategies. Successfully developed and tested algorithms.

INTERNSHIP

Embedded System Designs

Amsa Embedded Solutions
08/2022 - 09/2022,

ACHIEVEMENTS

Winners in VTU, Zonal inter collegiate
Shuttle Badminton (11/2021)

CERTIFICATES

Full Stack Web Development from Tap
Academy
